Education

Lakshmi Narain College of Technology — *October 2021 – Jul2025*
B.Tech from Computer Science — *7.5 CGPA*

Work Experience

Graduate Apprentice — *March 2026 – June 2026*
LTIMindtree — *OnSite*

- Developed and tested Java-based applications using Spring Boot and Angular following enterprise development standards.
- Collaborated on full-stack application development utilizing REST APIs, SQL databases, and modern software engineering practices.
- Implemented database operations, entity relationships, and ORM mapping using Hibernate and JPA.

Skills

Languages & Libraries	Java | Spring Boot | Spring Security | Hibernate | JPA | Angular | TypeScript | JavaScript | SQL | REST APIs
Tools & Software	Git | GitHub | Maven | Postman | VS Code | MySQL Workbench | MongoDB Compass | Swagger | MySQL
Others	Agile | Scrum | SDLC | OOPS | API Integration | JWT Auth | RBAC | MicroServices | Team Collaboration

Projects

Gladiator Drive-U – Driver Management & Booking Platform

- Developed a full-stack booking platform using Java, Spring Boot, Angular, and MySQL.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) for secure access management.
- Built RESTful APIs using Spring Boot and Hibernate/JPA for booking, user, and payment management.
- Integrated Razorpay payment gateway for secure online transactions.
- Leveraged third-party location APIs for address validation and location suggestions.
- Designed scalable database schemas and optimized backend workflows.
- Implemented AI-assisted features to enhance user experience and booking efficiency.
- Utilized Maven, Git, and Agile development practices throughout the project lifecycle.

Tech Stack: Java, Spring Boot, Spring Security, Hibernate, JPA, Angular, MySQL, JWT, REST APIs, Maven, Git, Razorpay

1962 Mobile Ambulance ERP System | Government of Madhya Pradesh

- Developed an enterprise ERP application for ambulance operations and emergency service management.
- Designed REST APIs using Spring Boot for managing ambulance, personnel, and emergency case data.
- Implemented role-based access and workflow automation for operational efficiency.
- Developed reporting modules for monitoring service performance and operational metrics.
- Optimized database operations and data management processes using SQL and JPA/Hibernate.
- Collaborated in the development lifecycle including requirement analysis, testing, debugging, and deployment support.
- Received recognition from Collector Sagar, **Shri Deepak Arya (IAS)**, for enhancing emergency service data management.

Tech Stack: Java, Spring Boot, Hibernate, JPA, Angular, SQL, REST APIs, Maven, Git

Achievements

-Completed LTM Orchard Training with Java FS Domain
-Awarded by Collector Sagar, Shri Deepak Arya (IAS) for enhancing data management in ambulance services.
-Successfully delivering multiple projects
-Leading my team to the final round of the Smart India Hackathon
-Completing the Cisco Virtual Internship with flying colors

Positions of Responsibility

Team Lead @ Gladiator:

- Led a team of 5 members in developing a full-stack booking platform, overseeing task allocation,development activities, and feature delivery.

Assistant Director @ IIME:

- Responsible for leading a team of over 100 members at a prestigious modern education institute.

Developer Intern @ 49Stores:

- Managed key tech operations and led development of scalable web projects aligned with business

Certifications

Govt. of M.P.	Certified by Collector Sagar, Shri Deepak Arya (IAS), for enhancing data management in ambulance services.
Cisco	Virtual Internship Program | Cybersecurity Essentials| Networking | Cloud Security | Packet Tracer
Coursera	Introduction to Cybersecurity Tools & Attacks(IBM) | Git n Github (IBM) |
